

TURBO

Global debut for Saab 9-3X

With distinctive looks, a versatile SportWagon body, higher stance, advanced all-wheel drive technology, excellent fuel efficiency and functional storage, the Saab 9-3X is the ideal alternative to large and heavy crossovers or SUVs.

The 9-3X is available with either Saab's 2.0 litre turbocharged petrol engine (210PS) combined with the technically advanced

Cross Wheel Drive system (XWD), or the highly regarded 1.9TTiD (180PS) diesel engine with front-wheel drive. Overall, the 9-3X embodies Saab's turbocharging philosophy, combining a dynamic driving experience with a fuel efficient powertrain to achieve responsible performance.

Saab designers have raised the chassis of the 9-3X 35mm higher

(20mm higher on the FWD diesel model) than the standard two-wheel drive SportWagon. This latest model is specifically designed for those who frequently use gravel or unpaved roads, without compromising the driving experience on tarmac.

With the addition of unique design, 5-spoke 17" alloy wheels, the 9-3X's exterior character reflects its ability to handle mixed

road conditions, whether rough or smooth, loose or paved.

At the heart of the 9-3X is Saab's cutting-edge XWD technology – an intelligent, active system that continuously distributes engine drive torque between the front and rear axles as required for optimum stability and traction in all conditions. To optimise traction, the Saab XWD incorporates an innovative, pre-emptive engagement of the rear wheels. Unlike conventional all-wheel-drive systems, this eliminates the need to detect front wheel slip before rear drive is activated.

Designed to make loading sports and leisure equipment easy, the 9-3X is surprisingly spacious and well-proportioned, and even incorporates a ski hatch, 12-volt power socket for a hot or cool box and generous storage compartments including a moulded holder for large bottles.

The Saab 9-3X will be available to order later this year. For more information, contact a member of the Squire Furneaux Saab sales team on 01582 679300.

Experience Saab with Squire Furneaux

Now comprising an authorised aftersales and approved bodyshop facility in Welwyn Garden City plus an impressive dealership facility in Dunstable, Squire Furneaux Saab has 15 years experience with the Saab brand and is dedicated to providing exceptional levels of service to customers across the region.

Offering expert advice and a personalised service, Squire Furneaux aims to make the car buying experience as simple and enjoyable as possible. At the Dunstable site, customers can browse an extensive range of new and Approved Used vehicles in a

light and relaxed environment, where a team of Saab specialists are on hand to help you explore all that Saab has to offer and update you on the very latest in Saab's evolving technology.

In addition, customers can choose to have their Saab serviced at either Dunstable or Welwyn Garden City which also includes a state of the art bodyshop and paint and repair centre. The Squire Furneaux team of Saab trained technicians work hard to deliver first-rate workmanship, providing swift and efficient vehicle repair and hassle-free maintenance to ensure that when a Saab is

repaired by Squire Furneaux, it is in the safest hands possible.

Squire Furneaux Saab customers can now take advantage of the £2,000 scrappage allowance from the Government and Saab,

making owning a 9-3 or 9-5 vehicle even more affordable. For full terms and conditions and to find out if your car is eligible, contact a member of the Squire Furneaux Saab sales team on 01582 679300.

Saab introduces EcoPower technology

Saab's most popular 9-3 diesel models now offer reduced CO₂ emissions and improved fuel consumption, thanks to Saab EcoPower Technology.

Saab EcoPower Technology combines the enjoyment of a dynamic driving experience with an efficient use of resources to achieve responsible performance. The new Saab 9-3X and 9-3 diesel models with lower CO₂ are the latest steps in this development strategy, which embraces turbocharging, engine rightsizing, Saab BioPower, aerodynamic performance and weight-saving design.

The 1.9TiD 150hp/110kW engine now produces just 137g/km with combined fuel economy of 54.3mpg. Likewise, the Vector Sport 1.9TTiD 180hp/132kW,

twin turbo engine, now produces 139g/km CO₂ and has an impressive combined fuel consumption figure of 53.3mpg. The SportWagon's figures are also improved, to 144g/km and 51.4mpg. In terms of CO₂ grams per horsepower, the twin turbo models (badged 1.9TTiD) are now among the top performers in their class.

The efficiency gains, averaging seven percent, have been achieved by a series of fine-tuning measures including: the use of wider gear ratios, a longer final drive, idle and low engine speed remapping, and an optimised tyre and wheel choice. 0-60mph acceleration is unchanged, while fifth gear 50-80mph times are increased by less than one second.

The CO₂ reductions are offered only with manual transmission; however automatic transmission is also available. These reduced CO₂ emissions offer valuable CO₂ tax-related

benefits for customers.

To find out more about Saab EcoPower, contact a member of the Squire Furneaux Saab Sales team on 01582 679300.

Avoid bad hair days

With the warmer weather on its way, Saab 9-3 Convertible drivers are looking forward to their first drop-top experience of 2009. But while driving your convertible with the roof down is guaranteed to turn heads, the last thing you want people to notice is your windswept look.

A Saab Wind Deflector is the answer. As simple as it is effective; this essential Convertible accessory clips on and off in seconds, deflecting wind away from the cockpit area whilst driving and dramatically reduces wind buffeting and noise. It fits neatly behind the front

seats to prevent wind swirl within the car when the roof is lowered, giving you a calmer, warmer and more comfortable driving experience.

The Wind Deflector has excellent view-through properties and when not required can be folded and stowed in the luggage compartment using the practical cover provided.

Suitable and easy to use, the Wind Deflector helps you to make the most of your Convertible and arrive at your destination cool, calm and collected, with hardly a hair out of place.

And now you can buy a Saab Wind Deflector from Squire

FurneauxSaab for a specially reduced price of only £299* while stocks last, so it won't even blow a hole in your bank balance.

To find out more, please contact a member of the Squire Furneaux Saab team.

The Tyre Price Promise

In addition to our free puncture repair service, the new Squire Furneaux 'Tyre Price Promise' on selected leading tyre brands means that if you buy a new tyre and find it promoted cheaper locally, we'll refund the difference. You may be

surprised how competitive Squire Furneaux tyre prices are. Terms and conditions apply. Call Squire Furneaux Welwyn on 01707 336300 or Dunstable 01582 679300 for more information or a price quotation.

Pushed to the X-treme!

The Saab Salomon Trail Running Series is back for 2009, with plenty of mud, water, steep mountain climbs and unpredictable terrain to test your stamina to the extreme.

Covering the length of the country, the Saab Salomon Trail Running series offers a wide variety of running events, ranging from 10K Forest trails in picturesque UK locations, to 'Trail Camps' which are designed to develop trail runners' skills at every level. Whether it's forest tracks, mud madness or exclusive foreign trails, runners can be sure of finding a suitably testing adventure on this year's calendar.

For those who are eager to push their boundaries of agility and resilience to the limits, the series offers four extreme running events to put even the most

experienced adventure runner through their paces.

Designed to celebrate the launch of Saab's new multi-terrain performance vehicle – the Saab 9-3X – the 2009 'Turbo X Trails' challenge runners with 10 miles of bogs, sand, water-filled marshes and gruelling hills.

At the heart of each trail, runners will face the 'Saab X Zone' – a 1-2 mile section of the roughest off-road track that will push competitors to the limit. It's worth it though – the entrant who completes the 'Saab X Zone' in the fastest time throughout the four 'Turbo X Trail' events will win a UK adventure weekend for two, courtesy of Saab Great Britain.

For information about the Saab Salomon Trail Running events, click on to www.saabsalomontrails.com.

At your service

Our service plans are designed to offer worry free motoring. Priced from £49.95 per month it's an easy way to budget for your regular servicing needs over your chosen period of time, allowing you to spread the cost of regular servicing through simple bite-sized monthly instalments, just like household bills. Pricing is simple – the only decision you need to make is how many appointments you would like the service plan to cover and we will calculate your monthly cost. Service plans are available for new and Approved Used Saab buyers and existing customers. The only restriction is that the car

must be at least model year 2000 and has covered less than 100,000 miles. To take up the service plan or for more information, contact Squire Furneaux's aftersales team at Welwyn 01707 336300 or Dunstable 01582 679300.

Hirsch Performance special offer

With spring now upon us and summer around the corner, now is the perfect time to enhance your Saab with styling accessories. Hirsch Performance specialists Squire Furneaux Saab have a range of special offers currently available on Hirsch Performance upgrades and accessories. Examples include 10% off all Hirsch Performance wheels and 30% off engine performance upgrades for Saab model year 2005 and older. Contact us now for more information.

A breath of fresh air

Squire Furneaux Saab is giving customers the opportunity to save up to 30% off the price of specially selected new Saab 9-3 Convertible models, giving you the chance to really turn heads on the road this summer while our limited stocks last.

The award-winning Saab 9-3 Convertible is a car that undeniably makes an entrance, and now that it's available from just £18,995 so can you. For a limited period and while stocks last, you could drive away in a brand new Linear SE model, fully equipped with a high specification including dual zone climate control, cruise control, ABS and 16-inch 14-spoke alloy wheels

for a surprisingly affordable price.

Ian Wooding Jones, General Manager of Squire Furneaux Saab, said: "The four-seater, four-season Convertible is the perfect car to be seen in this summer – whatever the weather. There truly has never been a better time to visit Squire Furneaux Saab to explore all that Saab's stylish, safe and spacious Convertible range has to offer. These exceptional savings are only available for a limited time so we would urge anyone interested to visit our showroom or call Squire Furneaux on 01582 679300."

Saab's iconic Convertible has, in recent years, become one of the

best selling premium convertibles in the UK, offering exceptional performance and luxurious comfort. As the first ever soft-top vehicle to achieve the maximum five-star rating in the Euro NCAP collision tests, the Saab 9-3 Convertible is a viable option for drivers who want to enjoy the intensity and performance of a sports car, but who also require a reliable vehicle that will adapt to even the most demanding of lifestyles.

To find out more about this unique offer, and see how you could save thousands, contact a member of the Squire Furneaux Saab team on 01582 679300.
